

4A

- ① Energy: People will use solar power
- ② waste: people will recycle almost everything
- ④ Transportation: More public transport and biking
- ⑤ food and water: less meat, less fresh water.
- ⑥ weather: more extreme weather

4B

- ① Likely to happen & more recycling, solar energy
- ② Definitely happen & less plastic use
- ③ Probably never happen & no air planes
- ④ most want & clean energy
- ⑤ least want & no fish left

Page 38 / 39 Summarize

In the Climate Stories Project, people from different countries talk about how the weather and climate have changed where they live, for example some places have hotter summers and less rain, while others have more floods or strong storms. The weather has become less predictable and many people are worried about the future, I think these stories show that climate change is real and it's affecting all of us in different ways

(A.1) Page 156

- ① cool ② chilly ③ freezing ④ boiling ⑤ mild
⑥ humid ⑦ breezy ⑧ drizzling ⑨ pouring
⑩ icy ⑪ sweltering

(C.2)

1. blizzard 2. drought ③ flood
4. hail 5. heat wave 6. hurricane
7. lightning 8. thunder 9. tornado 10. monsoon

(B.3) ① bright ② foggy ③ changeable
④ clear ⑤ scattered ⑥ settled
