- 4 - severe
- 5 - stitches

B. yesterday, I visited my doctor because I've had a fever, nausea, and a swollen lymph node for two days, he asked, have you been exposed to anyone with similar symptoms recently? I said that I hadn't ~~but~~ traveled but I had attended a large gathering, he listened to my lung and diagnosed me with a viral infection he prescribed rest, fluid and pain relievers this experience taught me that seeking early medical advice prevent complications

## Medical situation

- 1 - c    2 - a    3 - b    4 - d    5 - e
