Which is best ? For me Shanghai is the _____ because it's the _____ and the _____ exciting.

Where in the world ?

- If you could travel to any place in the world right now, where would it be?
- What are some activities you would like to participate in?
- Will you do any sightseeing? If yes where? If no why not?

Singapore: The city of the future

1. For tourists who want to visit a city that is ultramodern yet green and beautiful, is easy to get around and combines history, culture, and excitement, Singapore is the place. The Asian city-state has a population of 5.5 million people and an area of only 277 square miles (718 square kilometers) yet it is a high tech commercial center with one of the world's busiest ports.
2. Singapore doesn't have many natural resources. Located just one degree north of the equator. Singapore has a tropical rainforest climate- it's very hot and humid year round. It has no energy deposits, no forests, and no farms. For years, the country has had to import drinking water from its neighbor. Malaysia. "Singapore is not a natural country" says Chan Heng Chee, chair of the Lee Kuan Yew Centre for innovative cities at the Singapore University of Technology and Design. "For Singapore to survive, we have to be extraordinary," she says. "If we were ordinary, we would just disappear"
3. A city in a garden: To be sure it didn't disappear, Singapore long ago decided it wanted to become the world's " smartest city. For the past fifty years, the government has been striving to transform Singapore into the most innovative and sustainable metropolis on the planet. Today's smart city was the vision of former Prime Minister Lee Kuan Yew, who decades ago talked about his dream of creating " a city in a garden"

Yew's dream has come true. Walking around Singapore, it's easy to forget you're in a densely populated metropolis. Ten percent of land is parks and nature reserves. And trees and plants are everywhere in the downtown areas. Above the downtown jungle are 18 man-made futuristic " super trees", which are 50 meters tall. The supertrees moderate the temperature, absorbing and dispersing heat. They also collect rainwater. Several can even generate solar power.

4. Smart Transportation: Singapore has one of the world's most efficient transportation systems. A network of sensors, cameras, and GPS devices in Singapore's taxis help to prevent traffic jams. They track traffic, predict future congestion pricing system uses traffic data to adjust prices in real time; driver's accounts are automatically deducted as they drive through electronic gates. At intersections elderly and disabled residents tap traffic lights with special cards to extend street crossing times. Subway passengers rarely wait more than a few minutes for a train. Singapore discourages people from using cars. There is a limit (currently at a half percent) on how many new vehicles can be added to roadways each year. The government requires expensive certificates for automobile ownerships.

5. Water management: The city's water management system is among the world's most advanced. In 1963, water treatment was managed by multiple agencies, which made it difficult to formulate a long term strategy. So the government created a national water agency to manage the collection, production, and distribution of water in the city. Today, two thirds of Singapore's land is occupied by 17 water reservoirs. Wastewater is collected and treated to produce clean drinking water.

6. 13 million tourists: 13 million tourists come to Singapore to marvel at its modernity, explore its gardens, shop at its vibrant malls, and enjoy its many other attractions. The fun begins the moment that the plane lands at Changi airport where visitors can take a ride on the world's tallest airport slide in the world. It's four stories tall ! At Suntec City, one of Singapore's enormous shopping malls, visitors can admire the Fountain of Wealth. They can watch a concert on The Float at Marina Bay, the world's largest floating stage. They can visit Gardens by the Bay, the world's largest indoor garden in the world. And the wealthiest tourists can swim in the world's highest swimming pool- on the roof of the luxury Marina Bay Sands Hotel, it's 57 stories high ! Singapore is indeed a city of the future, and cities across the world are following its example. " Singapore is a pacesetter," says Chan of the Centre for Innovative Cities. "If we do a solution for Singapore and it works, others will come and see how we've done it."

Questions !

- Why do tourists like to visit Singapore?
- What is the weather like in Singapore?
- Does Singapore have many natural resources?
- What is a “smart” city?
- Why is Singapore called “ a city in a garden”?
- What are three aspects of Singapore’s transportation system that make it efficient?
- How does Singapore discourage people from using cars?
- What was the problem with Singapore’s water management system?
- How did the government fix the problem?
- What are three fun things to do in Singapore?

Activity Time : Let's divide into two groups choose a country and compare it with Singapore

- Search for buildings , tourist attractions, size of the country, currency etc.
- Use adjectives like:
 - Larger than / the largest
 - Bigger than/ the biggest
 - Cheaper than / the cheapest
