Let's discuss

Books

What is your favorite story?

Who is your favorite author?

Who is your favorite character?

What is your favorite genre? (Action/ Comedy/ Horror etc.)

What is the longest book you have ever read? How long did it take you to read it?

Did your favorite book become a movie?

True or False

- People who read books don't watch movies and vice versa.
- A written story requires your imagination to create the characters from your creation.
- The movie goers usually have a wider imagination than those who read books.
- Reading is much easier than looking at a TV screen for a long time.
- The speaker is convincing us to read books that are fiction or non-fiction rather than watch them.

Debate : Books Vs. Movies

- Group A : Will be debating the idea of using books over watching them as a movie
- Group B: Will be the opposing side debating the idea of watching a movie made into a book rather than read the book.

Classic Tales

Let's analyze

- Where does the story take place?
- Who are the characters?
- Is there a problem the main character faces?
- If so, how does he or she solve the problem?
- What's the most exciting part of the story?

With a partner put these in order

Terrence's dad said that Terrence had re-invented the color wheel.

Terrence's dad looked at Terrence's notes.

Terrence heard his dad's computer go on, and then he heard the printer printing.

When Terrence mixed yellow and blue, he got green. When he mixed yellow and red, he got orange. When he mixed red and blue, he got purple.

Terrence was learning to mix colors together to make new and interesting colors.

Terrence's dad was surprised when he looked at Terrence's notes about the paint color mixes.

Terrence wrote notes about which color mixes came out the best.

Terrence's dad showed him the picture he had printed from the computer.

The story: "Terrence Learns How We See Color"

Terrence was excited about his new watercolor set. He loved to draw and paint. He liked to draw and paint race cars, airplanes, and trucks. He liked to use all kinds of colors in his pictures. He was learning how to mix colors together to make new and interesting colors. He showed one of his new pictures to his dad one day. His dad said, "These are such amazing colors! Do you know how our eyes see different colors?" Terrence had never thought about that before, but he was interested. "No," he said. "We just see them, I guess." "Well," said his dad. "It's a little more complicated than that." "Tell me, then!" Terrence said. "Maybe it will help me learn how to mix cool new colors." "All right," Terrence's dad said. "But first you need to know about light. A light beam is made up of smaller beams of different colors. Our eyes see these many-colored beams as colorless. But when a light beams hit an object, our eyes see that object as a certain color. This is because the object absorbs all of the color beams except one. The color that isn't absorbed is the color we see." Terrence thought about all this for a bit. He thought he understood what his dad was saying. "What else can you tell me about color?" he asked. "I think you're really going to like hearing about how the color wheel works," his dad said. "But right now, it's time for dinner."
