How do they see the future?

My name is Lance and I am 15 years old. I am not sure what job I want when I am older, but I do know that I want to go to university. I am going to study English, Italian and Maths in Year 12& 13 and then go to a good university to study modern languages. Maybe I will become a famous writer or artist.

Hi, my name is Rosie. I am 17 years old. I am going to be a doctor when I am older. I love to study and will go to medical school when I am 20. Before this I am going to travel abroad, to Africa and India and work in hospitals to get some experience. I know it will be difficult, but I will be strong and won't get frightened or scared even if things get hard. I want to be the best!

When I am older I am going to travel more. I came to the UK from Italy when I was five and I will return there one day soon. As I am going to travel I will learn as many new languages as I can while I am at school. I really want to learn Chinese and Russian, but the school doesn't teach it at the minute, although the teachers say this will change soon! Sorry I forgot to say, my name is Laurent and I hope I will meet you on my travels in the future!

Contaminated mushrooms

The girl with two families

Life in the village of Polesse

The nuclear disaster changed the lives of everybody in the village. It took away all the hope for the future. However, when Palina was born in 1988 her parents did their best to give her and her brother a good life. They were farmers and before the accident, they sold meat, fruit, and vegetables to the international market. After the disaster, no one wanted to buy anything.

The villagers were often sick and depressed. When Palina was eight, experts from the capital Minsk, came to her school and did health tests on the children. The experts told them to stop picking the mushrooms in the forest because they were badly contaminated. When she was ten, the experts returned with news of a charity that helped children like Palina take vacations abroad. They asked her if she would like to go to Limerick, Ireland and stay with a family. Palina felt a little nervous about leaving home and she didn't speak a word of English, but she decided to go.

Life In Ireland

When Palina met her Irish family, she liked them immediately. John and Fiona Quaid and their two children, Chloe and Evan gave Palina a warm welcome. At first the only way to communicate was with a phrase book, but soon she became good friends with the children. They didn't need language to play.

So many things in Ireland surprised Palina. They visited a shopping mall and she couldn't believe her eyes because there was so much to choose from. She only knew her village store. She missed her family, but couldn't speak to them because they didn't have a phone.

By the time she went home, Palina could speak a few words of English and was very happy when the Quaid's invited her back. After, she started to visit the family twice a year and often spent three months with them in summer.

Palina today: “I’m so lucky!”

When Palina was in her teens, the experts returned to Polessye and checked her again. They couldn't believe how healthy she was. Her time in Ireland was improving her health and her English.

In her free time Palina helped run the farm. However, she didn't want to continue doing this for the rest of her life. She dreamed of becoming a doctor, but had no money to study. John and Fiona understood her problem. They offered to pay for her to study in Ireland and said she could stay with them full-time. Palina was amazed and happy. It was hard for her parents to see her leave , but they wanted the best for their daughter.

Palina is now studying biochemistry at the University of Limerick. She hopes to study medicine one day and return to Belarus to help those who are not as lucky as she is.
