

Intermediate 3 – Unit 5

Let's check your assignment 😊

**Useful/useless – informal – impossible – helpful- creative – imagination – automatically –kindness –reaction -
unlucky**

- Use
- Formal
- Possible
- Help
- Create
- Imagine
- Automatic
- Kind
- React
- Lucky

Choose the correct word to complete the sentence ... And add the correct prefix or suffix to the word

excite – react – help – formal – automatic – regular – imagine- create – use - suit

- 1- I can't wait to see Jack's _____ after he sees your grades, I hope he doesn't get disappointed.
- 2- The hardest part about the past tense verbs are the _____ verbs, because you have to change the whole word.
- 3- You don't need to park your car anymore , it parks _____just by clicking a button.
- 4- I wish at work they would allow us to wear _____ clothes, I hate this uniform.
- 5- Today kids are more _____than our generation they are always thinking outside the box.
- 6- Steve Jobs had a big _____ to believe that touch phones will be part of the future.
- 7- Sometimes umbrellas are _____ when the rain turns into a storm.
- 8- After my career shift I felt like it was more _____ for me.
- 9-This device will work through GPS and will be_____ in detecting a person at any location.
- 10- The news about the trip had the children jumping up and down with _____.

Answers

- 1- I can't wait to see Jack's **reaction** after he sees your grades, I hope he doesn't get disappointed.
- 2- The hardest part about the past tense verbs are the **irregular** verbs, because you have to change the whole word.
- 3- You don't need to park your car anymore , it parks **automatically** just by clicking a button.
- 4- I wish at work they would allow us to wear **informal** clothes, I hate this uniform.
- 5- Today kids are more **creative** than our generation, they are always thinking outside the box.
- 6- Steve Jobs had a big **imagination** to believe that touch phones will be part of the future.
- 7- Sometimes umbrellas are **useless** when the rain turns into a storm.
- 8- After my career shift I felt like it was more **suitable** for me.
- 9- This device will work through GPS and will be **helpful** in detecting a person at any location.

Let's try this exercise

- I can't do my homework tonight. I _____(go) to a movie.
- We _____(have) dinner at a nice restaurant on Saturday, but we haven't booked a table yet.
- My ski instructor believes it _____(snow) in the mountains tomorrow evening.
- On Sunday at 8 o'clock I _____(meet) my friend.
- They _____(fly) to London on Friday evening at 8:15.
- Wait! I _____(drive) you to the station.
- I _____(come) with you if you like.
- I _____(see) my sister in April.
- Look at the clouds - it _____(rain) in a few minutes.
- Listen! There's someone at the door. I _____(open) the door for you.

Answers

- I can't do my homework tonight. I **am going** to a movie.
- We **are going to have** dinner at a nice restaurant on Saturday, but we haven't booked a table yet.
- My ski instructor believes it **will snow** in the mountains tomorrow evening.
- On Sunday at 8 o'clock I **am meeting** my friend.
- They **are flying** to London on Friday evening at 8:15.
- Wait! I **will drive** you to the station.
- I **will come** with you if you like.
- I **am going to see** my sister in April.
- Look at the clouds - it **is going to rain** in a few minutes.
- Listen! There's someone at the door. I **will open** the door for you.

Let's listen to Rocket Man... CD 8

- Why is Steve so sure space tourism will happen? Why are Richard Branson and Jeff Bezos called “big names?”
- In What way does he compare space travel with internet?
- How will the passengers be like the early American astronauts? What are they not going to do?
- What influenced Steve as a small child? Why is his rocket called Thunderstar? What was he not allowed to watch?
- What was his parents' attitude about space travel?
- Why does he think it is necessary for humans to be in space?
- Why is skydiving good training for space tourists?
- How much has the couple paid?
- What does Steve think about every day?

Let's discuss

- When you hear the year 2050 or 2065, what comes to your mind?
- What predictions are you making about the future?
- Do you think rocket man is right? Why or why not?

Life in 2065

An international group of forty scientists have made some very surprising predictions about the future. They say that in the next fifty years the way we live will change in extraordinary ways, beyond our wildest dreams. Here are some predictions. You may find some them surprising.

1- Life expectancy

Within 50 years, living to 100 while still enjoying active, healthy lives will be the norm. Professor Richard Miller of the University of Michigan says. “
_____” we will be able to do the same for humans.” so with regular injections, centenarians will be as vigorous as today’s sixty-year-olds. Women will be able to give birth well into old age; their biological clocks could be extended by ten years.

2- Growing body parts

Professor Ellen Heber- Katz says: “People will take for granted that injured or diseased organs can be repaired in much the same way as we fix a car.

_____ Damaged parts will be replaced. Within 50 years whole-body replacement will be routine. “ But doctors will need huge supplies of organs for transplant. Where will they come from? Scientists say these could be grown inside animals from human cells.

3- Farming

By the year 2065, about 80% of the world's population will live in urban centers. The human population will increase by about three billion between now and then. _____. How will it be possible to feed all those people? A potential solution is vertical farming. Vertical farms, many stories high, will be build in the middle of the world's big cities. They will create urban renewal, sustainable production of a safe and varied supply (year – round crop production), and improved ecosystems.

4- Understanding animals

Thanks to a device which can “read” emotions, feelings, and thoughts, we will be able to “talk” to animals. The story of Dr.Dolittle will be fact, not fiction. “ This could first work with primates, then mammals, then other vertebrates, including fish,” says professor Daniel Pauly from Canada.” _____ so we might all become vegetarian.”

Cars

Just a few years ago, driverless cars seemed like science fiction. Now they are a reality, and will be on the roads soon. Driverless cars have a number of important benefits. First, they are safer, and will result in fewer accidents _____ . But it is unclear whether or when they will completely replace human drivers. Technology analyst Louis Basenese believe that human operated cars will someday disappear. “ I have no doubt that a driverless future is out ultimate destination. But we have a long road trip ahead of us before we arrived,” he says.

Parallel Universes

Advances in quantum physics will prove that there are parallel universes. In fact there may be an infinite number of them. These universes will contain space, time, and some of them may even contain you in a slightly different form. For years parallel universes only existed in the works of science fiction, but now Professor Max Tegmark says: _____ .

Our homes

What might our houses be like in the second half of the 21st century? This is Professor Greenfield's prediction.

As you enter the living room, sensors will detect your presence and the walls will start to glow. Talk to the walls and, activated by your voice, they will change to a color of your choice, "pink" to "green" to "blue" whatever suits your mood.

Sink into your glowing cyber-armchair, relax in the knowledge that the house computer will perform all your everyday household tasks. The voice system in the chair will address you by name and advise a change in position that will be better for your spine.

In the kitchen, _____ and it will automatically send orders to the supermarket. However, it is in the kitchen where "new" meets "old". Food remains in its old fashioned form. Pills, so confidently predicted in the 20th century to replace food, exist, but nobody wants them. There is too much pleasure in cooking, chewing, and tasting all kinds of food.

In groups

Apply sentence a-g into the correct place

- a. Lost limbs will regrow, hearts will regenerate.
- b. An estimated 109 hectares of new land will be needed to grow enough food to feed them.
- c. And they'll be less expensive, because people will be likely to rent rather than buy them.
- d. It is now routine to extend the lives of laboratory animals by 40%.
- e. your fridge will "know" when you are low on milk or any other item,...
- f. Soon their existence will be no more controversial than the existence of other galaxies 100 years ago.
- g. It could cause a global revulsion against eating meat....

True or False

- 1- Women will be able to give birth at the age of 100.
- 2- It will be possible to replace all the parts of the body.
- 3- Animal parts will be used for human organ transplants.
- 4- Big cities will rely on vertical farms for food supply.
- 5- Scientists believe that if we can talk to animals, we won't want to eat them.
- 6- Driverless cars will never replace human-operated cars.
- 7- There could be an infinite number of other universes.
- 8- The walls in your house will change color to suit your mood.
- 9- Your armchair will help you do your homework.
- 10- Pills will replace food.

Oral Quiz 2

Think of the future

- Are you optimistic or pessimistic about the future? Why?
- Where do you see yourself in ten, twenty, or fifty years from now?
- What will the world look like?
- What futuristic things from science fiction movies or books do you want to happen in real life?
- Do you think problems will increase or decrease? Why or why not?
